EQUINE HEALTH

In the twitch of an eye - Equine stress research

A horse will blink less and twitch its eyelids more when it's under mild stress according to study. This new finding could offer handlers a simple, easy-to-spot sign their animal is becoming agitated. The study, published in the journal *Animals*, is thought to be the first to reveal the significance of eyelid twitches as an indicator of stress, says Ontario Veterinary College Prof. Katrina Merckies. [Read on and watch the video!](#)
