EQUINE HEALTH

In the twitch of an eye - Equine stress research

A horse will blink less and twitch its eyelids more when it’s under mild stress according to study. This new finding could offer handlers a simple, easy-to-spot sign their animal is becoming agitated. The study, published in the journal Animals, is thought to be the first to reveal the significance of eyelid twitches as an indicator of stress, says Ontario Veterinary College Prof. Katrina Merkies. Read on and watch the video!
