**HAVE YOU HEARD?**

**Support Equine Guelph**

**Happy APP users**

"I'm not usually an App user but I tried this one because Equine Guelph created it. Now I have a 16-point horse health check at my fingertips for every barn I visit. This is so handy when I take on new clients. It gives me a baseline of what is normal for that horse as far as vitals go, checks hydration, capillary refill time and is a great tool to make sure nothing is missed on the full body check while grooming. I can't believe the body condition score, weight calculator and horse health check are all free in this amazing app! Planning on trying the $5 upgrade for tracking my own horses next. The appointment reminders are likely going to come in handy with my busy schedule!

*Janis, Horse Training & Sales*

So far you have told us we are right on track.

**Research Podcast**

Participants in a recent study on..."
horse movement and biosecurity reveal high engagement and good practices. Read on & listen to podcast.

2016 "YEAR OF BIOSECURITY"

MYTH Busters: I vaccinate therefore my biosecurity plan is done.

Vaccination is an important component in a biosecurity plan but not the only line of defence to protect horses from infectious disease.

See Equine Guelph's resource page for more information on access control, cleaning, isolation protocols, traveling with your horse... and get your copy of the new National Farm Level Biosecurity standard.

It's Coming!

The new National Farm-Level Biosecurity standard for the Equine Sector

It will be the first document of its kind, providing a detailed scientific approach to biosecurity, making it a good reference tool. A producers guide will also be published giving horse owners useful "how to" information. Both aim to help reduce the risk of disease transmission, minimize the impact of outbreaks and improve health and welfare of horses.

Equine Guelph was one of many, who sat on the development committee for this new standard, developed through a partnership of Equine Canada and the Canadian Food Inspection Agency (CFIA), in collaboration with Agriculture and Agri-Food Canada (AAFC).

Vaccination Equi-Planner

Take ten minutes to gain a customized immunization schedule using the Equine Guelph Vaccination Equi-Planner.

Vaccines are an important part of your horse’s preventative health program. The Vaccination Equi-Planner is an educational resource of Equine Guelph and the University of Guelph.

Discuss your individual needs with your veterinarian.

More on the immune system and how vaccines work

Vaccination Infographic

6 Videos on Vaccination explaining factors including age, location, risk...
Equine Guelph is spreading the word, not the germs; highlighting key points of the new standard. Stay tuned for monthly E-News features.
