BARN FIRE SAFETY

YOUR EVACUATION PLAN

Make a plan; include alternate plans and routes - and practice!
Plan should be scalable depending on the number of people available to assist.
In the event of a fire contact emergency response and always put human safety above animal safety.

BARN WITH STALL DOORS OPEN TO CENTRE AISLE

Option 2 - Leading and handing off to an enclosed paddock*

* haltering and leading will be more time consuming vs. letting a horse loose in a controlled manner

1) Catch and halter horse**

2) 1st person hands off lead to 2nd (3rd etc) person who leads to paddock

3) Once in the paddock, close gate, REPEAT

**halter and lead outside stall doors
